## **COURSE** Building High Performance Teams

### **“ What I learnt**

Deepened my understanding of trust, ownership, psychological safety, and how strong teams are designed, not just managed.

### **Key takeaway:**

High-performing teams are built on trust, ownership & psychological safety.

## **COURSE** User Awareness & Education for Generative AI

### **“ What I learnt**

Reinforced the importance of designing AI systems with user understanding, transparency, and education at the core.

### **Key takeaway:**

AI design must prioritize transparency, education, and user trust.

## **COURSE** Notion - Create a project plan

“

### **What I learnt**

Improved how I structure, document, and track projects for better cross-team alignment and visibility.

### **Key takeaway:**

Clear documentation drives alignment, accountability, and smoother execution.

## **COURSE** Use Canva to Create an Interactive Mind Map

“

### **What I learnt**

Explored visual thinking as a tool to simplify complex ideas, ideation, and stakeholder communication.

### **Key takeaway:**

Visual thinking helps simplify complexity and spark better collaboration.

# **COURSE** AI for Business - Generation & Prediction

“

## **What I learnt**

Learned how AI creates real business value, from generative use cases to predictive decision-making — beyond the hype.

## **Key takeaway:**

AI delivers value when aligned with real business problems — not just innovation hype

## Other courses done...

### 1 Managing with care course

#### What I learnt

A powerful reminder that empathy, clarity, and psychological safety are essential leadership skills — especially during change.

#### Key takeaway:

Empathy and clarity are powerful leadership tools — especially during change.

### 2 GenAI in Tech Organizations: Opportunities & Challenges

#### What I learnt

Gained perspective on adoption challenges, ethical considerations, and what it truly takes to scale GenAI responsibly in tech teams.

#### Key takeaway:

Responsible GenAI adoption requires strategy, ethics, and change management.

## What has Changed?

Each of these insights has begun to influence my approach to design leadership, team collaboration, and problem-solving driven by AI.

“

I am grateful for our organization, which provides access to continuous learning, and I eagerly anticipate applying these insights to my practical work.

**Thankyou!**
